Data Science:

Python, Numpy, Pandas, Statistics, Machine Learning, Deep Learning, Natural Language Processing, Generative AI, Keras, TensorFlow, Seaborn, Exploratory Data Analysis, PowerBI

Backend:

Core Java, Spring, Spring MVC, Spring Boot, Hibernate, Jersey, RESTful Webservices, Microservices

Frontend Web Technologies:

HTML, CSS, Angular, ReactJs, TypeScript, Bootstrap

RDBMS:

DB2, MySQL

Mobile Application:

Ionic Framework (Hybrid Mobile Apps), Android Native apps

Automation Testing:

Selenium, Cucumber

Others:

Maven, SQL, Sharepoint 2013, SCRUM Agile Process, Wordpress, Joomla, NPM

Web Servers:

Apache Tomcat, Oracle Weblogic, Firebase

Tools used:

Atlassian JIRA, Atlassian Bitbucket, Atlassian Bamboo, Eclipse, IntelliJ Idea, Visual Studio Code, Netbeans, STS, Android Studio, Jenkins, TeamCity, Anaconda, Jupyter Notebook, SonarQube

Experience

Project Experiences:

CITI - Citicorp Services India Private Limited/ Officer -
Application Development - Full Stack Developer
August 2021 - Present, Pune India

Project Name: Core Data Platform Applications - NAM region

Working proactively & independently to address development requirements and articulate issues/challenges with enough lead time to address risks.

Part of the development team to develop, enhance, support and maintain solutions for GFTS and ICG Data Services applications.

Understanding Business Requirements and Functional Requirements provided by Business Analysts and to convert into Technical Design Documents and leading the development team to deliver on those requirements.

Working closely with Cross Functional Teams e.g. Business Analysis, Product Assurance, Platforms and Infrastructure, Business Office, Controls and Production Support. Prepare handover documents; manage SIT with oversight of UAT and Production Implementation.

Identifying and proactively resolving issues that could affect system performance, reliability, and usability.

Demonstrate an in-depth understanding of how the development function integrates within overall business/technology to achieve objectives; requires a good understanding of the industry.

Understanding complex data problems, analyze and provide generic solutions compatible with existing Infrastructure. Design, Implement, Integrate and test new features.

Taking responsibility for successful delivery of the solutions. Mentoring other developers on their implementation as needed, and organizing review activities like design review, code review and technical document review etc. to ensure successful delivery.

Exploring existing application systems, determine areas of complexity, potential risks to successful implementation.

Contributing to continual improvement by suggesting improvements to software architecture, software development process and new technologies etc.

Building relationships with business and technology stakeholders.

Team Size: 8 - this includes Developers, Testers, Business Analyst, Software Architect, Product Owner and Scrum Master.

Project Name: SonarQube Engineering - Code Quality & Developer Enablement

Worked as a Subject Matter Expert (SME) for enterprise Code Quality platforms - SonarQube, supporting large-scale developer pipelines and ensuring seamless integration across diverse technology stacks.

Collaborated closely with developers and engineering teams to provide technical support, troubleshoot complex issues, and enhance overall developer experience. Conducted root cause analysis to minimize recurring incidents while proactively monitoring infrastructure stability and performance to ensure high availability.

Collaborated with engineering teams to manage platform upgrades and maintain system efficiency and security.

Identified and implemented automation opportunities to improve operational efficiency and streamline workflows. Additionally, contributed to the adoption of AI-enabled tools to enhance developer productivity and ensured adherence to organizational risk, compliance, and security standards.

Team Size: 6 - this includes Developers, Software Architect, Product Owner and Scrum Master.

Virtusa Consulting Services / Senior Consultant - Technology

December 2020 - August 2021, Pune India

Project Name: HSBC - Hongkong and Shanghai Banking Corporation Software Development India- Pune, India - Global Market Applications

Working on a HSBC Project application for HSBC - Hongkong and Shanghai Banking Corporation Software Development, UK. This is an Agile Project that builds, maintains and supports software.

Responsibilities include driving full-stack end to end solutions based on daily conversations with the product owner.

Enabling the team to effectively gather requirements for each feature, remove blockers and drive the project forward per the committed roadmap.

Supporting the product owner in making technology and architecture related decisions to groom the backlog as well as help in prioritizing features.

Drive effective team behaviors and where applicable work processes in place to avoid chaos.

Solving challenges posed by large scale and high technology applications.

Supporting the Infrastructure and applications that one works on.

Also, includes Devops role and include L2/L3 production support responsibilities.

Team Size: 11 - this includes Developers, Testers, Business people, Software Architect, Product Owner and Scrum Master.

LTI - Larsen & Toubro Infotech / Senior Software Engineer

January 2019 - November 2019, Ballerup Denmark

December 2019 - December 2020, Pune India

Project Name: Velliv (former Nordea Life and Pensions) Denmark - Decentral Java Applications

Worked on Pension Portal application for Velliv, Denmark. This application is built on Angular at the front end and Java at the backend. It facilitates the Customer Company administrators to enroll new employees and also modify their information.

Responsibilities include requirement gathering, coordination with other teams (OSB, BPM, Mainframe), development of MVP, presentation to stakeholders, completion of development according to prototype, monthly minor releases, quarterly major release, etc.

We followed Scrum methodology while development, having daily standups, planning meetings, backlog refinement and review meetings at sprint end.

Team Size: 9 - this includes 2 Developers (1 Frontend, and 1 Backend) 2 Testers, 2 Business People, Software Architect, Product Owner and Scrum Master.

LTI - Larsen & Toubro Infotech / Software Engineer

February 2016 - January 2019, Pune India

Project Name: Velliv (former Nordea Life and Pensions) Denmark - Decentral Java Applications

Project Description: The purpose of the project was to develop, support and maintain Velliv (former Nordea Life and Pensions), Denmark applications.

Responsibilities include developing the backend for Going Mobile (Mobile application). Also worked on its Net Pension Application. It is a web application which has two role based functionality. First is for individual customers, where they can see their policy information, insurance cover, benefits, check documents, modify personal information, etc. And the second is for company administrators, where they can create new employees, change their information, resign employees, etc.

Responsibility also includes maintenance and supporting its other 6 dependent Java applications.

Team Size: 15

LTI - Larsen & Toubro Infotech / Graduate Engineer Trainee

October 2015 - January 2016, Mumbai India

Project Name: Nordea Bank, Norway - Lotus Notes Migration

Project description: The purpose of this project was to Migrate applications from Lotus Notes to Microsoft SharePoint 2013.

Further understanding the functionality of Lotus Notes and implementation in Microsoft SharePoint 2013 using SharePoint Features.

Team Size: 14

Education

Birla Institute of Technology & Science (BITS), Pilani / Master of Technology (M.Tech) - Data Science and Engineering

April 2020 - March 2022, WILP Pilani, Rajasthan India

Government College of Engineering, Chandrapur / Bachelor of Engineering (B.E.) - Electronics and Telecommunication Engineering

August 2011 - August 2015, Chandrapur India

Army School / Schooling

June 1998 - June 2010, India

Extra Curricular Activities

National Service Scheme at Ministry of Youth Affairs and Sports, Government of India / College President

August 2013 - August 2015, Chandrapur India

The National Service Scheme (NSS) is a Central Sector Scheme of the Government of India, Ministry of Youth Affairs & Sports. It provides an opportunity to take part in various government-led community service activities & programmes. The sole aim of the NSS is to provide hands-on experience in delivering community service.

Responsibilities include organizing events in college like Blood donation camps, Awareness programs, Visiting NGOs, Street theater, etc.

Also, represented college at State level.

National Cadet Corps at Ministry of Defense, Government of India/ Cadet Army Wing - Grade B

June 2008 - June 2009, Chandrapur India

The NCC is a voluntary program - where basic military training in small arms and parades is given. It is a responsive, learning and continuously evolving organization. It aims at developing character, comradeship, discipline, motivation, the spirit of adventure and ideals of selfless service for the nation.
